EDUCATION

Ph.D. in Informatics and Information Processes Penza State Technological University	Oct 2022 – Ongoing
Master of Science in Information systems and technologies Penza State Technological University Graduated with High Honours	June 2022
Master of Science in Information Systems Security University of Blida 1 Graduated with High Honours	June 2019
Bachelor of Science in Information System and Software Engineering University of Blida 1 Graduated with High Honours	June 2017

WORK EXPERIENCE

Business Intelligence Analyst "Komandor"	Krasnoyarsk, Russia April 2023 – Present
- Built and maintained 30+ dashboards using Power BI and Apache Superset. - Worked with cross-functional teams to define KPIs and improve reporting standards. - Reduced weekly reporting time by 40% through automation and SQL optimization. - Designed datasets in ClickHouse and used Jinja for dynamic filtering and conditional logic - Created custom Superset charts with HTML/CSS to enhance clarity and decision-making impact. - Led the end-to-end development of client dashboards, from data modeling to final delivery.	
SQL Database Administrator "Settlement and Billing Solutions"	Penza, Russia Oct 2021 – Oct 2022
- Improved query performance and reduced report time by 25% - Cleaned and structured raw data into ready-to-use analysis tables - Monitored SQL pipelines and ensured 24/7 database uptime - Supported BI analysts by delivering reliable and consistent data outputs	
Junior Java Developer "C.E.R.I.S.T"	Algiers, Algeria Sep 2019 – June 2020
- Developed backend services using Java and Spring Boot - Participated in agile sprints, stand-ups, and QA testing - Used SQL for database access and GitLab for version control - Gained hands-on experience in professional software development	

SKILLS & INTERESTS

Languages: Fluent in French, English, Arabic, and Russian, with professional proficiency in both written and verbal communication across multicultural environments.

Technical Skills:

- SQL (advanced querying, optimization, and data modeling with ClickHouse and relational databases)
- Python (Pandas, NumPy) for data engineering, ETL, and automation
- BI tools including Superset, Power BI, and Tableau for dashboard design and KPI reporting
- Git and Docker for version control and deployment.

Interests: Focused on advanced data engineering and visualization techniques to strengthen strategic, data-driven decision-making and business impact.
